SAGE verified the capacity of the features in the analysis and modeling, and found that those identified in the 2015 FERC Part 12D performed adequately during a design earthquake.

5. CONSIDERATION: January Storm Events Damage Report
General Manager O’Halloran reported that several storm events impacted the Yolo region and the District’s infrastructure in January. Immediately after each storm event, staff inspected the District’s infrastructure to assess the damages. O’Halloran provided the Board with an overview of the observed damage and timeline for repair and replacement of the damaged infrastructure. To-date, the largest impacts to the District’s system are the erosion at the head of the West Adams Canal along the bank of Cache Creek and the damage to the Chapman Reservoir inlet.

Due to timing issues, staff recommended the Board declare an emergency for repairing the damage and erosion to the canal system. District staff also recommended the Board reaffirm General Manager O’Halloran to represent the District as needed for state and federal cost recovery.

M/S/C declared an emergency for repairing the canal system, and reaffirmed General Manager O’Halloran to represent the District as needed for state and federal cost recovery.

Sicke reported that approval by the Board of Directors is required to adopt the revised resolution and ensure financial reimbursement from Cal OES in the future.

   Ayes: Directors Barth, Brice, Rominger, and Vink
   Noes: None

7. CONSIDERATION: Temporary Stormwater Diversion Permit for Groundwater Recharge
   Assistant General Manager Sicke provided an update on the temporary permit process for diverting stormwater for groundwater recharge. The District submitted a temporary water right permit application on December 13, 2016 to divert up to 72,000 acre-feet of excess flows at the Capay Diversion Dam; up to a rate of 600 cfs. After negotiations with the State Water Resources Control Board and Central Valley Regional Water Quality Control Board (Regional Board) the District received a temporary permit on January 12, 2017.

   Sicke reported that diversions would continue to be delayed for a few weeks due to current storm events and respective damage throughout the canal system. Sicke discussed the permit conditions that require the District to quantify the groundwater extraction and use and determine that the extractions are from water stored by the District and not based on other claims of right.

   Staff requested that the Board approve the proposed resolution to monitor groundwater use during the 2017 irrigation season and comply with permit conditions.

M/S/C approved adoption of Resolution 17.04 to Monitor Groundwater Use During the 2017 Irrigation Season.
   Ayes: Directors Barth, Brice, Rominger, and Vink

9. PRESENTATION: Sustainable Groundwater Management Act (SGMA) Implementation
General Manager O’Halloran reviewed the Yolo Sustainable Groundwater Management Act (Yolo SGMA) “white areas” concept and potential options available for management. Options include 1) management by the County of Yolo, 2) management by water districts as memorialized through a contract with the County of Yolo, and 3) management by water districts through a formal annexation process. If the District was interested in annexing property as part of Yolo SGMA implementation, a formal annexation process would be followed and zones or areas of benefit would be identified to attribute the appropriate fees for participation in the program. O’Halloran reported that the annexation process likely could not occur before June 30, 2017, and interim management would need to occur through a signed contract with the County of Yolo.

O’Halloran reported on the upcoming Yolo SGMA Subcommittee and Working Group meetings, scheduled for February 8, 9, and 15, 2017. O’Halloran also reported that two public outreach meetings for Yolo SGMA were scheduled for February 8 and February 22, 2017, being held in Woodland and Winters, respectively.

10. DIRECTORS’ REPORTS
Director Brice reported that she attended the Northern California Water Association (NCWA) Board and NCWA Strategic Planning meetings in January. Director Vink reported the selection of committee members for 2017, which were essentially the same as 2016 with the exception of the removal of the Sites JPA Committee.

11. ATTORNEY’S REPORT
Legal Counsel Bezerra reported on Assembly Bill 313 (AB 313) as introduced by Assemblyman Adam Gray (D-Merced) to overhaul California’s water management structure. AB 313 proposes to restructure the administration and enforcement of water rights and the State Water Project. Bezerra reported that authority and enforcement over water rights would be moved from the State Water Board and housed under the Department of Water Resources (DWR) with enforcement proceedings.
conducted separately by the Office of Administrative Hearings. DWR’s current authority and water rights underlying the State Water Project would be transferred to a new State Water Project Authority to eliminate the conflict of DWR administering and enforcing water rights while possessing water rights of its own. AB 313 could potentially impact the District if the water rights fees and structure is revised.
